3% Reduction in revenue leakage from unauthorized equipment

5-8% Reduction in unplanned downtime

12% Faster tenant acquisition process

10% Increased Asset Utilisation

10% Improvement in site space utilization rate

INFOZECH'S ASSET LIFECYCLE MANAGEMENT SOLUTION: iASSET

Telecom Infrastructure providers invest substantial financial resources in procuring, monitoring, and maintaining assets that form the backbone of telecom networks. However, without proper tracking and management, assets can be **underutilized, lost, or prematurely replaced**, leading to **financial losses** and **operational inefficiencies**. Inaccurate asset records can also impact CWIP (Capital Work in Progress) tracking and overall **asset monetization** efforts. With TelCos increasingly hiving off tower assets and M&A activities becoming more frequent, ensuring accurate asset valuation and compliance has become critical.

Infozech's iAsset is a cloud-based asset lifecycle management solution designed to tackle these challenges by effectively managing assets from **Acquisition to Retirement**, ensuring **financial accuracy and operational efficiency**.

FEATURES OF iASSET

Inventory & Procurement Management – Ensures optimized stock levels, project-based allocation, and PO-linked asset receipts, while enabling accurate CWIP tracking and capitalization of assets to maintain financial accuracy.

Site Audit & Digital Due Diligence – Supports smart checklists, geo-fencing, photo/video proof, and flexible data collection for single source of truth

Seamless System Integration – Connects with ERP, FAR, Billing, Data Warehouse, and O&M systems for **real-time data synchronization**.

Tenant & Site Lifecycle Tracking – Manages complete site and tenant lifecycle, including multi-tenant management, ensuring accurate asset data for billing alignment and **revenue assurance**.

End-to-End Asset Lifecycle Management

Enables complete asset lifecycle, including **warranty tracking** and monetization strategies to maximize ROI on Capex spent on asset.

Real-time Asset Tracking

Through QR and barcodes, it provides **real-time visibility** into asset movements across site upgrades, repairs, replacements, new builds, and warehouse transfers.
